

NGA NATIONAL GEOSPATIAL-INTELLIGENCE AGENCY

Jeanne Stacey NGA Data Corps

Jeanne M. Stacey is a senior data leader at NGA. As a founding member of NGA Data Corps, she manages the NGA Data Corps Enabler Division, guiding a team of 40 data scientists, analysts, engineers and stewards in using data to improve mission enabler functions for the agency. She is the author of the NGA Unified Data Strategy, and is currently leading the Data Corps in designing, developing and deploying data science solutions.

Ms. Stacey has more than 25 years of experience with data, and has been with NGA for more than 10 years. Prior to coming to the IC, she was a data and systems manager, architect and developer of US Army services and private industry applications. She has an MS in Engineering Management.

Ms. Stacey is passionate about sharing information to reduce complexity in decision making. She advocates for smarter management of data and seeks to integrate efforts across the agency using data as a focal point. She is skilled in data engineering & development, systems engineering, enterprise architecture, portfolio management, and strategic planning. She is excited to develop the next generation of leaders!
