NGA statement in response to recent reporting on dust created by a cleanup debris pile from the future site of the Next NGA West campus in North City:

The National Geospatial-Intelligence Agency is proud of our seven decades as a member of the St. Louis community. We work here - we hire here - our children go to school here - we are your neighbors. As we transition from our historic location on 2nd Street, we are partnering closely with the city of St. Louis on the long-term health, safety and prosperity of our future neighborhood and its residents in North City. The agency has followed with concern the reporting related to the dust emanating from the cleanup debris pile near Gateway Elementary. NGA Director Robert Cardillo is confident after speaking with Mayor Lyda Krewson Thursday that every effort is being made to ensure that the site's cleanup is meeting the safety and health requirements necessary to protect the public.

###

About NGA

NGA delivers world-class geospatial intelligence that provides a decisive advantage to policymakers, warfighters, intelligence professionals and first responders.

NGA is a unique combination of intelligence agency and combat support agency. It is the world leader in timely, relevant, accurate and actionable geospatial intelligence. NGA enables the U.S. intelligence community and the Department of Defense to fulfill the president's national security priorities to protect the nation.
