

BUILD YOUR OWN  
**TREASURE MAP**  
NGAKIDS

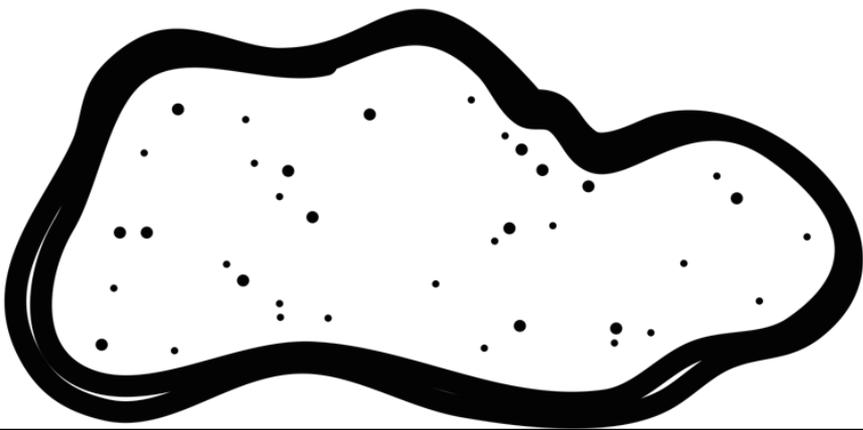

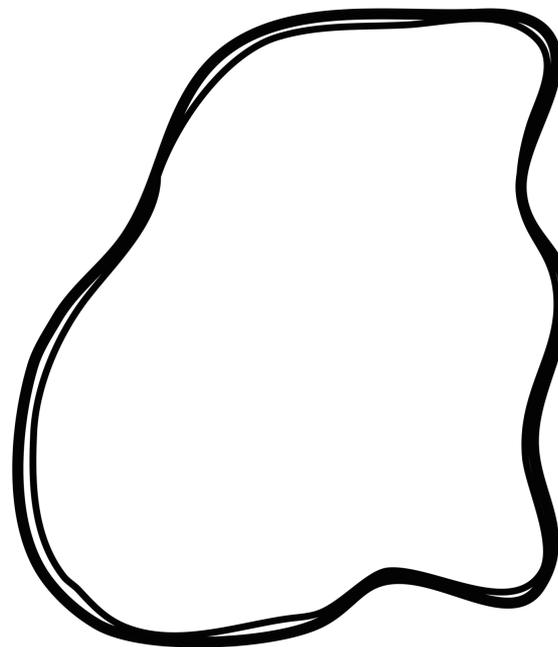

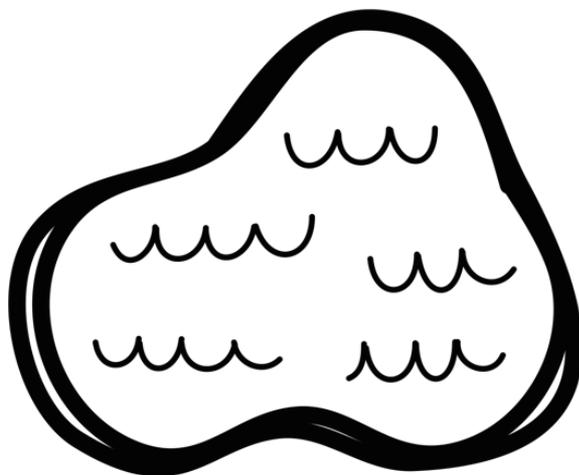

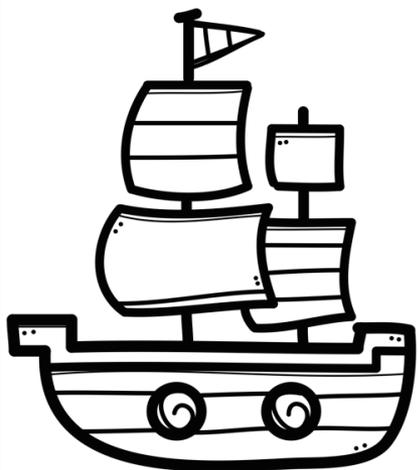

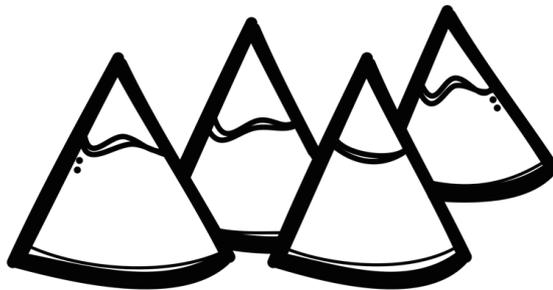

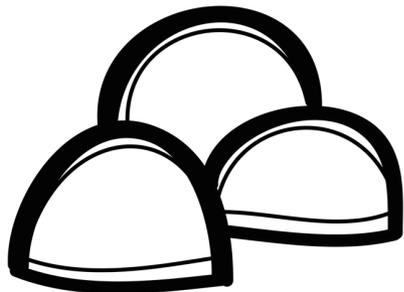

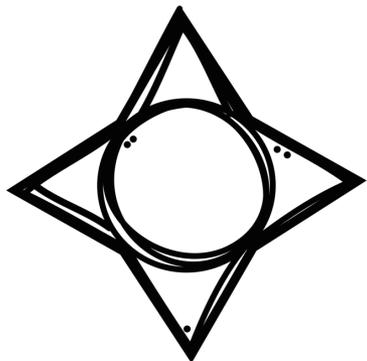

## Directions

If you are teaching maps to your students this is a fun activity to have them complete! My students LOVE making their own pirate treasure maps! Have each child color and cut out the symbols. They will paste the symbols on their map. I included two sets of symbols because one has a pirate boy while the other has a pirate girl. I also have my students make a dashed line to show the trail of their map that leads to a big red "X." X marks the spot! Also included is an outline of what each symbol is for your own understanding.
